

# TECHNICAL DATASHEET

## UV TESTING

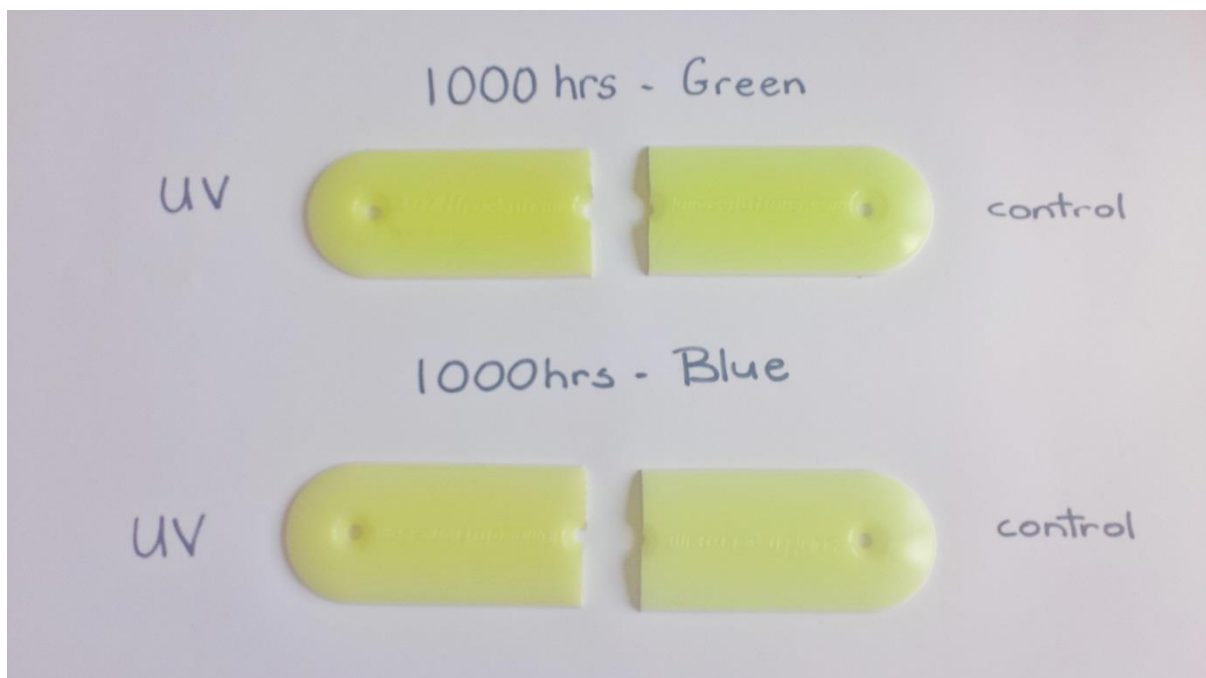

Two samples of Lumo Trackntrim 190mm strips were tested. One was marked BLUE, the other one as GREEN. The samples were dissected to gain a control piece.

## Test Conditions

The samples were left in the UV chamber for 1000 hours at 60°C under UVB lamp.

## Results

Samples under UV have shown some signs of discolouration, slightly darker in shade in comparison to the controls. However, no physical degradation was observed. Overall samples have shown little change.

Samples after 1000 hours under UV compared to control.
